

M-O-NIA CARE

Natural

Ammonia Binder

DESCRIPTION

M-O-Nia Care is a unique combination of Yucca and Probiotics.

Yucca schidigera is dry plant powder grown in deserts of Baja California, Mexico. Today the *Yucca schidigera* extract is used as a natural medicine, a foaming agent and flavor enhancer in the food and beverage industries, and as an additive for feed in the aquaculture, poultry, swine, and cattle farming

Poor performance in farms due to high levels of ammonia gas can be corrected by using extract of the *Yucca schidigera* plant.

The extract *Yucca schidigera* when added to animal feed has been shown to lower noxious ammonia gases in animal wastes, dramatically controlling dangerous and foul odors.

The extract has also been found to increase animal performance by lowering intestinal and blood ammonia levels.

Additionally the extract is used in sewage processing for the reduction of ammonia and other chemical components causing foul odors.

The *Yucca schidigera* extract presents beneficial properties for animals, due to presence of mainly two important biochemical components in it and those are **Saponins** and **Glycocomponents**

COMPOSITION

Yucca schidigera, *Bacillus subtilis*, *Bacillus amyloliquefaciens* with selective carrier

PRESENTATION

300-400 g / Ton of feed

500 g/ Hactare of pond

USAGE & ADMINISTRATION

300-400 g / Ton of feed

500 g/ Hactare of pond
