

Multiple Enzymes Powder

Poultry and Animal feed supplement

GevoZyme

Enzymes are naturally occurring proteins that act as Biological catalysts. It breaks down larger molecules into smaller ones in the gut of the bird, which can then be utilized at optimum level.

Composition

Each 1KG contains:

Xylanase	800000 Units
Protease	1300000 Units
Cellulase	1000000 Units
Beta Glucanase	350000 Units
Amylase	335000 Units
Phytase	2000000 Units
Pectinase	3000 Units
Carrier	Q.S.

Benefits

- Breaks Anti-nutritional factors
- Makes nutrients available in the intestine
- Improves utilization of Amino acids
- Optimum feed utilization and hence improves FCR
- Reduces mortality and incidence of diseases
- Better weight gain
- Increases availability of polysaccharides and polypeptides
- Decreases viscosity and loose droppings
- Increases phosphorus availability from phytase
- Increases calcium retention
- Reduces loss of phosphorus.

Role of Enzymes

Xylanase:	Acts on NSP's
Protease:	Acts on Proteins
Cellulase:	Acts on cellulose Fibre
Glucanase:	Acts on Glucan
Amylase:	Acts on high starch
Phytase:	Acts on Phytate, Phytic acid Proteins
Pectinase:	Acts on pectins

Usage & Administration

Broilers: 300 to 350 g / MT of feed

Breeders: 250 to 300 g / MT of feed

Layers: 200 to 250 g / MT of feed

Or As Advised by Veterinarian / Nutritionist
