

CEUQNOL

Halquinol 12.5 %

CeuQnol 12.5% is a non-antibiotic, antimicrobial molecule belonging to the group of Hydroxyquinolines. The active ingredient in it is Halquinol. It is an approved growth promoter for poultry and swines. **CeuQnol 12.5%** is a controlled blend of 3 potent chlorohydroxyquinoline molecules. The molecule is active against fungi, gram positive and gram negative bacteria and protozoal organisms. It acts basically in the digestive tract, and does not get absorbed into the systemic circulation, thereby reducing the chances of tissue residues. **CeuQnol 12.5%** also slows down peristalsis, thereby increasing absorption of nutrients and water from the distal end of the large intestine and in specific cases controls wet droppings.

Composition:

Each 1kg contains: 12.5 % of Chlorhydroxyquinoline

Benefits:

- * Improves Feed conversion.
- * Treatment for non specific diarrhea and wet dropping.
- * Increase Egg production & body weight.

Inclusion rate:

Growth promoter: 250-500g/ ton of feed

Treatment: 1 Kg/ ton of feed for 5-7 days

Presentation:

25KG
