

UniCell Aqua

live yeast culture for aqua

UniCell Aqua is used as a feed supplement for stronger immunity, enhanced muscle growth, weight gain, and increased productivity of Fishes, Shrimps & prawns. It contains live yeast that have ability to reduce effects of pathogens on aquatic life. This feed is also admired for having ability to activate and boost intestinal immunity where most pathogens attack and grow. **UniCell Aqua** serves as source of Amino acids, Proteins, B Complex Vitamin and other growth promoting agents.

Composition:

Saccharomyces Cerevisiae 20 billion CFU/gm
Excipients Q.S.

Benefits:

- * Provides better stress resistance.
- * Ideal to be used for bioremediation.
- * Improves feed intake and digestion.
- * Activates intestinal immunity.
- * Increases feed palatability, feed intake, digestibility and fermentation.
- * Efficient nutritional supplement.
- * Excellent source of Proteins, Vitamins (B Complex).
- * Reduces the effects of Pathogenic bacteria.

Inclusion Rate:

5 to 7 gm per kg of feed

Presentation:

1KG, 5KG & 25KG
