

VacciMach

Accurate & Quick Dosing System

○ Electro-Pneumatic

ADVANTAGES OF VACCIMACH

- Quick & Accurate dosing
- Vaccinates upto 3500 chicks per hour
- Cost saving
- Reduces labour cost
- Better performance of the vaccination process
- Less stress in the chicks
- Better management
- Easy to operate

FEATURES OF VACCIMACH

- Very high accuracy (1 millisecond)
- New U.L.P.I.C Technology
(Ultra Low Power Consumption Intelligent Control)
- Count per compartment
- Buzzer on completing box quantity
- Large & attractive LED display & LCD screen
- Single Shot/ Twin Shot mode selection and indication
- Error Alarm Indication and password protection

Vaccination

i/ii MODE VACCIMACH TWINSHOT MODE

Only one prick for two medicines.
Sequence: First needle prick-First medicines injected
Second needle comes out-Second medicine is injected.

NECKLINE CONTOUR

State of the art impeccably designed sensor block & feather touch button made to accommodate the chicks precisely and on its own. Perfect placement at high speeds avoiding any chances of injury.

BIOSECURE ENVIRONMENT

Strong Stainless Steel ensures long life and special non corrosive grade materials enables exceptional Biosecurity. Easy to clean and sanitize.

ULTIMATE SAFETY

Proprietary design gives the ultimate safety with ease of vaccination at good speed, which is made possible by the specially designed electronic block with a feather touch button sensor.

ERGONOMIC TROLLEY

An Ergonomic Trolley is optionally available for easy pick and place function for the chicks. A lamp can be positioned such that it facilitates better visibility adding to the grading efficiency.

PATHOLOGIES

Marek, Newcastle Disease, Fowl Pox, Avian Influenza, Gumboro

Model	VacciMach
VacciMach Type	Hatchery and Farm New Compact & strong
Operating Mechanism	Electro-Pneumatic Highly proven mechanism
Application	Recommended where the compact machine is needed and compressed air is available at the farm or the hatchery.
Vaccination Cost	Negligible vaccination operational cost of 1.25 € / 10000 Chicks
Life & Maintenance	Durable and easy to maintain

Model	VacciMach
Speed	3500 Chicks/ Hour
Twin Shot	2500 Chicks/ Hour
Air Consumption	Single Shot 1.1LPM, Twin Shot 1.3LPM
Dosage	0.1ml, 0.2ml, 0.25ml, 0.3ml and 0.4ml
Dimensions (LxBxHmm)	630 X 150 X 200
Weight	12.4 kg
Working Pressure	4 Bar
Power	230 VAC, 50Hz

- Proven Electro-Pneumatic for subcut vaccination recommended for perfect Hatchery Practice
- The VacciMach Stainless Steel body is easy to clean
- Ergonomic Design of VacciMach enables the operator to vaccinate chicks accurately easily and quickly
- Reduces stress during continuous operation
- Compact and strong Electro-Pneumatic machine for the hatchery & farm
- Recommended for Mid & Large size farm operation
- Easily movable because of its lighter weight and compact size
